AUTOMATION IS LIFE

Simple. Smart. Seamless. Toush Inspired by Pensonic (Toush) are smart appliances designed to flow with you. Be immersed in a delightful world of appliances that are designed with aesthetic appeal in mind, seamless functionality and pleasant interaction that satisfies and supports your lifestyle. Your stylish Toush appliances are Wi-Fi enabled and comes with a smart phone app, allowing you to enjoy a world of flexibility and energy savings with automated scheduling, energy usage monitoring, and alerts about performance and servicing to ensure your appliances are always well maintained. Learn new ways to simplify your life and let Toush work its magic in your living space. Why settle for less when you can have more?

Contents

WHAT IS TOUSH?

Discover a vast world of automation possibilities with Toush Smart Home Appliances!

Toush Inspired by Pensonic (Toush) are smart IoT appliances that are WiFi-enabled, and all the appliances in this series can be remotely controlled using the single Toush App.

Toush signifies touching, sensing, exploring and experiencing life in delightful ways. Toush smart IoT appliances are intuitive appliances that sense and respond to the user, and can be remotely controlled using touchscreen devices. These appliances connect, automate, quantify, optimise energy and resources, giving you more savings while fitting seamlessly into your lifestyle.

Through Toush smart appliances' different sensors such as temperature, air quality, location, vibration, humidity and other sensors, they interact with their environment, delivering useful data and practical recommendations to ensure a comfortable environment for you and your loved ones. Toush appliances are also voice control enabled and compatible with Google Assistant and Alexa for enhanced customer experience and comfort.

Töush

You can use smart card to provide access to specific people

Use password to allow access to family or limited access for guests

Toush Fingerprint sensor uses advanced high-resolution images of fingerprint in 360-degree orientation and groups each fingerprint into precise categories.

Deadlock
Function

Here's a powerful function. You can lock manually using this lock function, but the door cannot be opened using any mode.

*Support visual password max 20 digits

Tóush

123456 ***** or ***** 123456

Anti-peep Protection
Password

Stop strangers from finding out your password with this anti-peep protection password function. Type in random numbers, followed by the actual password in sequence, and then random numbers again. The door will open as long as the correct password is typed in sequence. No one will know what is the actual password. Supports up to maximum of 20 numbers.
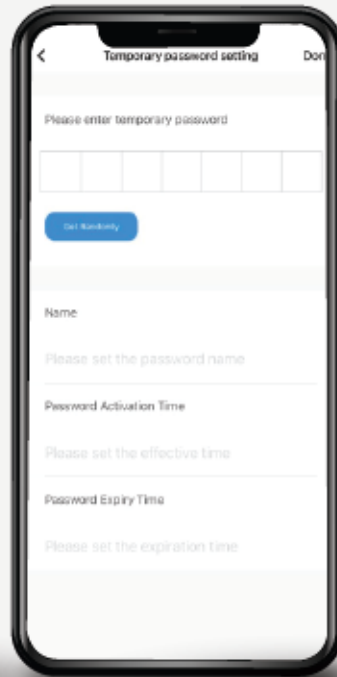

Limited Period
Access

Unexpected guests but you're away from home? Why not give a single use password? Toush App will generate a Dynamic password that is valid for only 5 minutes. This password can be sent remotely via smart device.

Hi, I am outside your door now.

Smarter
Renting & Hosting

Toush Smart Door Lock makes renting out rooms and hosting a breeze. Connect your Toush Smart Door Lock with Toush App and send your renters an auto generated code that expires on checkout. You can even revoke their passcodes whenever you need to.

SOS

Hijack
SOS Alert!

In the event a thief is forcing you to open the door, you have no choice but to comply, but once you use the special hijack password or finger print, your family will immediately receive notification from Toush App to alert them you are in danger and need help.

SOS!

Automation
Scenarios

Create automation scenarios with Toush Smart Door Lock and Toush Smart Switches. As soon as a Toush Smart Door Lock is opened, the Toush Smart Switch automatically turns on the light to illuminate your living space.

Lights ON

Door Open

Toush

Long Lasting
Power Supply

Toush Smart Door Lock is powered by 4 AA Alkaline batteries and has a battery life of up to 12 months, subject to frequency of usage. If battery needs to be replaced, low battery alerts will be sent via Toush App, giving you ample time to get new ones.

Emergency
Power Supply

In the event you could not change your batteries on time and the Toush Smart Door Lock batteries are completely drained, you can use your power bank as a temporary power source until you get your new batteries (use USB Type-C charger).

T88401SCS-ZVDC	12V	1.5A	0.8-1.2Nm	90rpm	0.16m/s	45kgs	4.2m

DC Motor

- Computerised DC Motor
- Less shaking compared to AC motor
- More energy efficient and safe
- Easier control
- Powerful industrial level transformer

Toush Touch

Control your wireless curtain from anywhere. Just pair your Toush Smart Curtain with Toush App and enjoy the convenience of opening and closing your curtain with just a touch on your smart device. You can even schedule it to open and close as you wish!

Simple Operation

User friendly design that is easy to operate, smart and safe!

Low-Power

DC Motor power is independent of load. Using only 12V, it uses the lower transformer power, therefore generates lower heat. This means a longer motor working life.

Big Torque

Big Torque withstands heavier curtain load.

Stable Movement

Big Motor has better stability. The bigger the motor, the better the motor structure and PCB controller. The bigger and heavier motors are also more durable.

Multiple Functions

Convenient operating features allow pull to start, and can manually pull curtain when power is turned off. Also, it stops running when there is resistance. The operation is extremely smooth with gliding action.
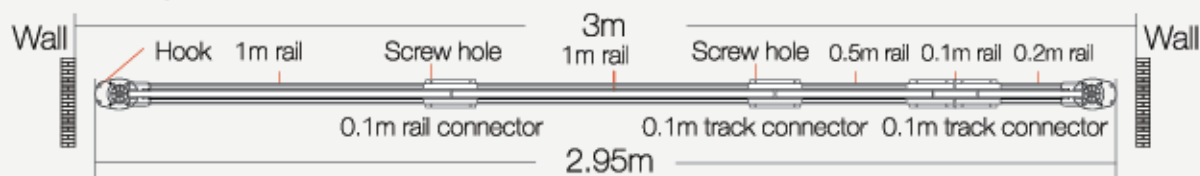

Installation tips
Standard mounting

- Adjustable motor position (left or right)
- Automatic or adjustable limit setting
- Ceiling mounting bracket provided

Smart Curtain Rail Installation Guide

Example: 3 meters rail solution

Wall

Hook   1m rail   Screw hole   3m 1m rail   Screw hole   0.5m rail   0.1m rail   0.2m rail   Wall

0.1m rail connector   0.1m track connector   0.1m track connector

2.95m

Note:
The gearbox is 0.15m. The gearbox extension size is according to the different curtain motor model.
The installation space between the rail and wall should be at least 0.01m.

1. The 0.5m, 0.2m and 0.1m rails are adjustable. The 0.1m rail is a connector and should be mounted on the head of the curtain rail (the closest position to the wall).
2. Accessories: Remote control, mounted brackets, wall switch (optional), 90° rail joints (optional), 135° rail joints (optional).
3. Please use 0.05m rail to fix rails between 0.01m and 0.05m.

	Total Length	Suitable Size
1	2.2M	<2.16M
2	3.2M	2.16M-3.16M
3	4.2M	3.16M-4.16M

Built-in high-efficiency chipset has a strong processor, low power consumption and is super energy saving.

Only light touch is required to activate the smart curtain's movement. Just pull the curtain slightly in one direction with your hand, and the curtain's motor will automatically run until fully opened or closed.
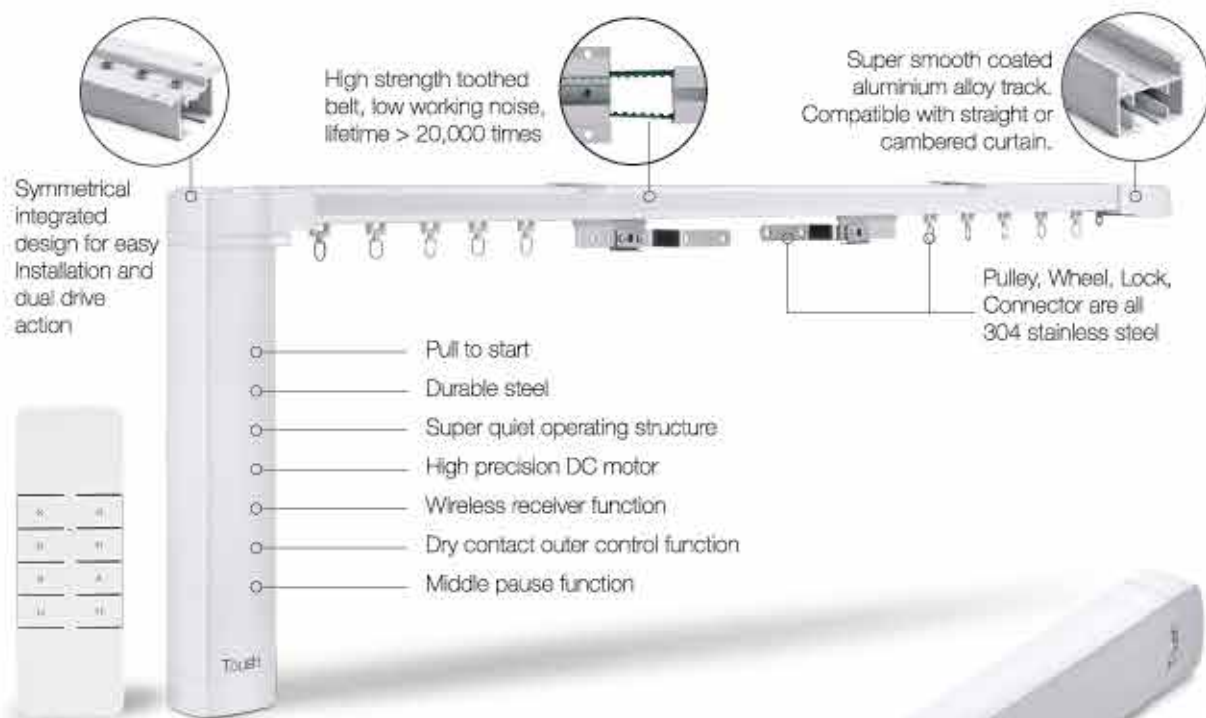

No worries! Whether there is power cut or not, can open curtains manually.

Hassle free installation with easily fixed, ready parts.

Schedule your curtains to open and close at your preferred time. You can even create customised automation scenarios such as opening curtains when you come home or closing curtains when it is time to sleep.
